

Design your own experiment using the scientific method!

Observation:

Question:

Hypothesis:

Experimental design

i. Independent variable:

ii. Dependent variable:

iii. Constant variable:

iv. Control:

v. Method:

(Briefly describe your experimental design. How do you plan to conduct your experiment?)

Analysis:

(What outcome will you be recording? You do not have to create results for your experiment, only describe how the results will be collected.)
